DISTINGUISHED VISITING SCIENTISTS 2017 AWARDEES

JUAN GOUTMAN

INGEBI CONICET, Universidad de Buenos Aires

Hosted by: Paul Fuchs, Johns Hopkins School of Medicine, Department of Otolaryngology-Head and Neck Surgery

Project: Structure and function analyses of how calcium influx, endoplasmic storage and release may contribute to synaptic function.

MENACHEM HANANI

Hebrew University-Hadassah Medical School

Hosted by: Xinzhong Dong, Johns Hopkins School of Medicine, Department of Neuroscience

Project: Advanced methods to determine glial cells influence on nerves, pain transmission and sensation.

MENNO WITTER

Kavli Institute for Systems Neuroscience/ Centre for Neural - NTNU

Hosted by: Michael Miller, Johns Hopkins University, Department of Biomedical Engineering

Project: Development of a common representation of structural data on animal models, AD patients, and healthy humans focussing on the entorhinal-hippocampal system.
